-
- 10 Placement is the stage where illicit cash is first introduced into the financial system.**

Placement marks the entry point of dirty money into banks or other financial channels.

-
- 11 Layering involves moving funds through complex transactions, often via structuring, to hide their origin.**

Layering is designed to obscure the audit trail by passing funds through multiple transactions or accounts.

-
- 12 Integration is the stage where laundered money re-enters the economy as apparently legitimate wealth.**

Integration completes the laundering cycle, making illicit funds appear to come from a legitimate source.

-
- 13 The IIBF AML & KYC exam is an objective, multiple-choice test delivered online in English.**

The certification is assessed through computer-based MCQs rather than descriptive or offline papers.

-
- 14 STR, or Suspicious Transaction Report, is a key reporting format candidates must know for the AML & KYC exam.**

Banks file STRs with FIU-IND when a transaction appears connected to money laundering or suspicious activity.
