20 One-Liners to Remember

Quick-fire facts for last-minute revision.

- 1 The Diploma in Treasury, Investment and Risk Management (TIRM) is offered by IIBF.**
It is a specialised certification aimed at bankers in treasury, dealing room and risk functions.
- 2 TIRM combines three interlinked disciplines: treasury management, investment management, and risk management.**
Each pillar is a profession in its own right, and together they form the backbone of modern bank finance.
- 3 A bank's treasury manages liquidity, invests surplus funds, and runs the dealing room.**
The treasury also ensures the company always has enough funds to meet its ongoing obligations.
- 4 Investment management involves allocating capital today with the aim of earning returns while balancing risk.**
It decides where a bank parks its money and how to build a portfolio that grows wealth steadily.

IIBF - Revision - Diploma in Treasury, Investment and Risk Management (TIRM): Complete 2

-
- 5 Risk management is the process of identifying, assessing and controlling threats to an organisation's assets and earnings.**

These threats can be economic, legal, strategic or operational in nature.

- 6 The TIRM treasury and investment module covers money market, forex market, capital market and treasury products.**

This half of the syllabus builds understanding of markets, instruments and the desks that run them.

- 7 The TIRM course covers front office, mid office and back office functions within treasury operations.**

This teaches how trades are executed, settled and monitored across different desks.

- 8 The TIRM risk management module covers Asset-Liability Management (ALM) and the Basel Accords.**

These topics explain how regulators and banks keep the financial system stable.

- 9 ALM and the Basel Accords are described as the two heavyweight topics in the TIRM risk management module.**

Mastering them helps candidates understand core regulatory and balance-sheet risk concepts.

IIBF - Revision - Diploma in Treasury, Investment and Risk Management (TIRM): Complete 2

-
- 10 TIRM is aimed at bankers working in treasury, dealing rooms and risk departments.**

The diploma is built for professionals who want to specialise in these niche banking functions.

- 11 Popular career paths after completing TIRM include Treasury Analyst, Risk Manager and Compliance Officer.**

Other paths mentioned include Financial Planner and Investment Analyst roles.

- 12 A Treasury Analyst analyses and improves a company's cash flow, liquidity and risk strategies.**

This role involves studying financial data and designing investment strategies that balance return and risk.

- 13 A Risk Manager identifies, evaluates and controls risks and rolls out mitigation plans across an organisation.**

These roles exist across banking, insurance and corporate finance sectors.

- 14 A Compliance Officer ensures banks and credit unions follow applicable rules and guidelines.**

This role includes designing regulatory programmes and tracking internal processes to prevent misconduct.

- 15 TIRM-related career opportunities extend across banks, NBFCs, insurers and corporates, not just banks.**

The knowledge gained applies broadly across the financial sector.

IIBF - Revision - Diploma in Treasury, Investment and Risk Management (TIRM): Complete 2

- 16 The TIRM course covers regulatory topics such as compliance, supervision and Basel frameworks.**

This regulatory relevance is one of the reasons the diploma is considered valuable in 2026.

- 17 A recommended TIRM study plan suggests mastering money market, forex and capital market basics before derivatives and ALM.**

Building foundational market knowledge first makes advanced topics easier to grasp.

- 18 Revising Basel and ALM topics twice is recommended because they carry significant exam weight.**

These heavyweight topics reward repeated reading during preparation.

- 19 Skipping ALM and Basel topics is flagged as the most common mistake TIRM candidates make.**

Ignoring these heavyweight topics costs candidates easy, predictable marks.

- 20 Information technology plays a growing role in how modern treasury operations are run end to end.**

Technology now drives how money moves between desks and how trades are settled.
