20 One-Liners to Remember

Quick-fire facts for last-minute revision.

- 1 CAIIB Information Technology (including Digital Banking) is one of the elective papers in the CAIIB framework.**
Candidates choose it instead of other optional CAIIB subjects.
- 2 The CAIIB Information Technology paper typically has 100 MCQs for 100 marks.**
This is the standard question count and marking scheme for the paper.
- 3 The qualifying mark for the CAIIB IT paper is typically 50.**
Candidates generally need this score out of 100 to clear the paper.
- 4 The CAIIB IT exam duration is typically 2 hours.**
This is the standard time allotted for the 100-question online paper.
- 5 The CAIIB IT exam is conducted online in Hindi or English.**
Candidates can typically choose either language medium for the online exam.

IIBF - Revision - CAIIB Information Technology Previous Year Question Papers PDF (2026):

6 There is typically no negative marking in the CAIIB Information Technology paper.

This means candidates should attempt every question rather than leave any blank.

7 DHCP is the protocol used to assign IP addresses automatically.

DHCP dynamically allocates IP addresses to devices on a network.

8 The Address Resolution Protocol (ARP) is used to find the MAC address corresponding to an IP address.

ARP resolves a known IP address to its corresponding hardware MAC address.

9 A compiler translates a high-level language program into machine-level language.

This translation lets source code run as executable machine instructions.

10 One terabyte equals 2^{40} bytes.

This is the standard binary definition of a terabyte in computing.

11 Errors in computer programs are commonly called bugs.

This is standard terminology used across computing and IT literature.

12 Li-Fi stands for Light Fidelity.

It is a wireless technology that uses light for data transmission.

IIBF - Revision - CAIIB Information Technology Previous Year Question Papers PDF (2026):

-
- 13 Ctrl+Alt+Delete in Windows can be used to terminate an application task or reboot the operating system.**

This key combination opens options including task termination and system restart.

- 14 Information transfer between the CPU and cache happens in terms of words.**

Words are the standard unit of data exchange between these components.

- 15 Memory management, input/output management, and job scheduling are functions of an operating system.**

These are core responsibilities handled by an operating system.

- 16 Advanced Bank Management (ABM) and Bank Financial Management (BFM) are core papers in the CAIIB framework alongside electives.**

Most CAIIB candidates must clear these compulsory papers along with their chosen elective.

- 17 Other CAIIB electives besides Information Technology include Rural Banking, Human Resource Management, Risk Management, and Central Banking.**

Candidates choose one elective from this broader list based on their role or interest.

- 18 A website conventionally has only one home page.**

The home page is the single primary entry point of a website.
