20 True or False

Decide, then check the answer and reason below each statement.

Question 1

CAIIB Information Technology is offered as an elective paper, not a compulsory one, within the CAIIB framework.

TRUE

Candidates choose it in place of other optional CAIIB subjects.

Question 2

Advanced Bank Management and Bank Financial Management are elective papers that candidates may skip.

FALSE

ABM and BFM are core compulsory papers most candidates must clear.

Question 3

The CAIIB IT paper is typically a 100-question, 100-mark online MCQ exam.

TRUE

This is the standard question count and marking scheme for the paper.

Question 4

The CAIIB IT exam is typically conducted over a 4-hour duration.

FALSE

The standard duration for the paper is typically 2 hours.

Question 5

The CAIIB IT exam is typically conducted with no negative marking.

TRUE

This means an educated guess costs nothing and may earn a mark.

Question 6

Because of negative marking, candidates are advised to leave difficult CAIIB IT questions blank.

FALSE

There is typically no negative marking, so candidates are advised to attempt every question.

Question 7

DHCP is the protocol used to assign IP addresses automatically to devices on a network.

TRUE

DHCP dynamically allocates IP addresses to connected devices.

Question 8

ARP is used to find the IP address corresponding to a given MAC address.

FALSE

ARP works the other way: it finds the MAC address corresponding to a known IP address.

Question 9

A compiler translates a high-level language program into machine-level language.

TRUE

This translation allows source code to run as executable machine instructions.

Question 10

One terabyte equals 10 to the power of 20 bytes.

FALSE

One terabyte equals 2 to the power of 40 bytes in standard computing usage.

Question 11

Errors in computer programs are commonly referred to as bugs.

TRUE

This is standard terminology in computing for program defects.

Question 12

Li-Fi stands for Light Fidelity.

TRUE

Li-Fi is a wireless technology that transmits data using light.

Question 13

An assembler is defined only as a person who physically assembles computer hardware parts.

FALSE

In computing, an assembler is a program, not a person assembling hardware.

Question 14

Information transfer between the CPU and cache typically happens in terms of words.

TRUE

Words are the standard data unit exchanged between CPU and cache.

Question 19

Rural Banking and Human Resource Management are examples of other CAIIB elective papers besides Information Technology.

TRUE

These are among the other elective options candidates can choose in the CAIIB framework.

Question 20

Solving previous year papers alone, without chapter-wise revision or mock tests, is described as sufficient for a confident pass.

FALSE

A confident pass requires combining previous papers with syllabus study and timed mock tests.
